

Microsoft 365 Business Premium

Microsoft 365 Business Premium is an integrated solution, bringing together the best-in-class productivity of Microsoft 365 Business Standard (formerly Office 365) with advanced security and device management capabilities.

Purpose built for small and medium sized businesses, Microsoft 365 Business Premium gives you best-in-class productivity and collaboration capabilities such as Exchange, OneDrive, Skype for Business, Microsoft Teams, SharePoint and business apps from Microsoft 365 Business Standard (Bookings, Outlook Customer Manager, MileIQ, Microsoft Listings, Microsoft Connections, Microsoft Invoicing) as well as device management and security solutions, enabling your teams to work smarter and safer from anywhere, from any device.

At Complete I.T. we have a wealth of knowledge around Microsoft having been top tier Microsoft partners for many years. Having 5 Gold Microsoft Competencies as well as 2 silver, this affords us the benefit of the best support, training and pricing available.

What's Included?

Microsoft 365 Business Premium bundles together Microsoft 365 Business Standard (formerly Office 365), Windows 10, and Enterprise Mobility + Security.

Microsoft 365 Business Premium gives you access to Windows 10, the latest Microsoft operating system.

Benefits of Microsoft 365 Business Premium include:

Productivity

Including Word, Excel, PowerPoint and OneNote meaning your team can quickly create, edit and improve documents from anywhere at any time.

Mail

Sign in to your account and access Outlook from anywhere.

Collaboration

With SharePoint and OneDrive, your teams can share and collaborate on content from anywhere at any time.

Chat

With Teams, add anyone to your meetings with just one click. You can record meetings, and schedule them straight from Outlook.

Device & Data Protection

Provides data encryption for your end user devices protecting them against loss or theft. Provides protection and encryption for email and file data, ensuring sensitive data cannot be shared or copied.

Device Management

All devices whether Windows, MacOS, iOS or Android based can be centrally managed and secured. Devices can be remotely wiped or have all business data removed remotely.

Device Deployment

New devices, such as laptops, can be used straight off the shelf, without any IT configuration. Simply logging on with your business email address will enrol the device, install software and secure it.
