

Microsoft Power BI

Gain a 360 view of your organisation with Power Bi

Do you struggle with making sense of all the data that you process? It can be a complex and time-consuming challenge with input needed from multiple departments but with Power BI it can be turned into an automated, simple process.

Microsoft Power BI is part of the Microsoft Power Platform, a powerful business intelligence solution which allows organisations to connect to all their data sources, so they can create and optimise insightful dashboards and reports, in easy to digest visuals.

Make instant sense of data, allowing your team to:

- Discover insights,
- Uncover trends
- Understand what influences your KPIs.

You'll get the big picture and will be able to share critical data, ask important questions and make decisions, driven by data which will help you to achieve a competitive advantage.

Microsoft Power BI features include:

Easy to understand visuals

Simple dashboards and reports which are easy to understand and can help you make important business decisions, based on data.

Connect with multiple sources

Connect with hundreds of data sources to create insightful live reports, reducing the complexity of using multiple analytics systems.

Updates in real-time

Once reports and dashboards have been created, they can automatically update in real-time, so that you never miss a thing, and you can make better business decisions.

Save time

Spend your time more wisely by reducing how long you are collecting data and instead using it to analyse and make decisions.

Have full control of who has access

Admins will have full visibility of who can access sensitive data and can implement restrictions where necessary.
