Microsoft Power Apps

Turn Your Ideas Into Smart and Simple Apps

When thinking about how Power Apps can help you, you need to first identify the processes you have in place and ask yourself "could this be improved?". If the answer is yes, but you're not quite sure how, Complete I.T. are here to provide a tailored service that will improve your operations and efficiency.

From everyday processes to niche requirements, Microsoft Power Apps gives you the ability to turn your ideas into smart and simple apps. Power Apps is part of the Microsoft Power platform, alongside Power BI, Power Automate and Power Virtual Agents.

With Power Apps you can build custom apps to transform manual and repetitive tasks into innovative simple processes.

Power Apps can be securely shared, enabling seamless collaboration with your teams and customers, on phones, tablets and can be easily embedded onto your website. Power BI can also be integrated so that you can create dashboards and reports that update in real-time, giving you access to the data you need to fully understand the return.

Microsoft Power Apps features include:

Fully customisable

Whatever your problem or process you'd like to improve, Microsoft Power Apps is fully customisable and can be tailored specially to meet your business goals and objectives.

Connect to data

You can connect your data sources to create a smart app that pulls in data to improve your business operations, sales and service offerings.

Benefit from low code

Instead of waiting for long development times, Power Apps uses low code which means a much quicker turnaround time, without compromising quality.

Seamless collaboration

Power Apps can be securely shared, enabling seamless collaboration with your teams and customers, on phones, tablets and can be easily embedded on to your website

In some cases, it's obvious that your process is not working and needs changing but in other circumstances, you may just be used to the same old routine and don't realise that there are ways to automate and improve manual processes.

Examples of Power Apps:

- Hot Desk Booking App

- Employee Onboarding App

- Retail Sales Floor App

- Education Sector - Work Submission App

- Managing Manufacturing Processes App
